Projects

Portfolio – Personal Project [Live]   06/2025 - 07/2025

A responsive and interactive portfolio site to showcase web development projects and skills.

- Developed a fully responsive portfolio website using React.js to highlight personal and professional projects.
- Integrated **Framer Motion** for smooth animations and interactive transitions, enhancing user experience.
- Utilized **ReactBits components** for consistent UI and modular development practices.
- Implemented responsive grid layouts and navigation optimized for desktop and mobile views.
- Followed clean code principles and SEO best practices to improve accessibility and discoverability.

Quick-Cart – E-Commerce Website [Live]   01/2025 - 02/2025

An E-Commerce website that facilitates online shopping experiences.

- Developed an E-Commerce platform, Quick-Cart, using React.js with a modern UI/UX built with Tailwind CSS.
- Integrated secure API calls for product listings, shopping cart functionality, and user authentication.
- Designed a responsive and user-friendly interface with grid layouts and smooth navigation for enhanced shopping experience.

Twins AI – Gemini Clone [Live]   11/2024 - 12/2024

A Gemini clone chatbot project emphasizing real-time communication capabilities.

- Developed a chatbot interface with React.js.
- Used API endpoints to generate real-time responses with optimized performance.
- Focused on accessibility and minimalistic UI principles.
